## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas et al (US. PUB. 2002/0059627A1) and Kerbs (U.S. 5,557,320).

As per claim 1,16 & 20 Thomas disclosed a media distribution system operative to selectively deliver media content to a media presentation device, the media distribution system comprising: a media delivery service provider operative to transmit a media content stream to a media distribution device (page.1, paragraph.3); a customer account database for maintaining a central account associated with the media distribution device, the central account identifying a portion of the media content stream that is selected for delivery to the media presentation device (page.6, paragraph.92); to a local account date module for maintaining a local account identifying the portion of the media content stream that is selected for delivery to the media presentation device (page.3, paragraphs.48 & 49).

However Thomas did not disclosed in detail a local account manager for modifying the local account data module; wherein the media delivery device delivers to the media presentation device portion of the media content stream identified by the local account data module. In the same field of endeavor Kerbs disclosed a local account manager for modifying the local account

data module; wherein the media delivery device delivers to the media presentation device portion of the media content stream identified by the local account data module (col.6, lines 39-62).

It would have been obvious to one in the ordinary skill in the art to incorporate the capability of modifying more than one type of media contents feeding into the media distribution device for display and thus making and it more versatile and increase its interoperability.

3. As per claim 2 Thomas-Kerbs disclosed the media distribution device of Claim 1, wherein the media content is delivered over a communication link between the media distribution device and a media delivery service provider (Thomas, page.4, paragraph 56).

4. As per claim 3 Thomas-Kerbs disclosed the media distribution device of Claim 1, wherein the communication link is a broadband connection (Kerbs, col.4, lines 38-50).

5. As per claim 4 Thomas-Kerbs disclosed the media distribution device of Claim 3, wherein the broadband connection is an asymmetric digital subscriber line (Kerbs, col.4, lines 38-50).

6. As per claim 5 Thomas-Kerbs disclosed the media distribution device of Claim 1, wherein the communication link is a satellite connection (Kerbs, col.6, lines 31-38).

7. As per claim 6 Thomas-Kerbs disclosed the media distribution device of Claim 1, wherein the local account manager can be remotely controlled (Thomas, page.2, paragraph 41 & page.4, paragraph 59).

8. As per claim 7 Thomas-Kerbs disclosed the media distribution device of Claim 1, wherein the local account manager can be remotely accessed (Thomas, page.2, paragraph 41 & page.4, paragraph 59).

9. As per claim 8 Thomas-Kerbs disclosed the media distribution device of Claim 7, wherein the local account manager can be remotely accessed via the media adapter (Thomas, page.2, paragraph 41 & page.4, paragraph 59 & 61).

10. As per claim 9 Thomas-Kerbs disclosed the media distribution device of Claim 7, wherein the local account manager can be remotely accessed via the data adapter (Thomas, page.2, paragraph 41 & page.4, paragraph 59 & 61).

11. As per claim 10 Thomas-Kerbs disclosed the media distribution device of Claim 1, wherein the media content is delivered over a communication link between the media distribution device and a media delivery service provider and wherein the local account manager can be remotely accessed by the media delivery system (Thomas, page.2, paragraph 41 & page.4, paragraph 59 & 61).

12. As per claim 11 Thomas-Kerbs disclosed the media distribution device of Claim 10, wherein the local account data module can be transmitted to the media delivery service provider (Thomas, page.2, paragraph 41 & page.4, paragraph 59).

13. As per claim 12 Thomas-Kerbs disclosed the media distribution device of Claim 11, wherein the media delivery service provider is operative to store the local account data module (Thomas, page.4, paragraph 59 & page.6, paragraph 91).

14. As per claim 13 Thomas-Kerbs disclosed the media distribution device of Claim 1, wherein the local account manager can be locally accessed (Thomas, page.3, paragraphs 48 & 49 and page.4, paragraph 56).

15. As per claim 14 Thomas-Kerbs disclosed the media distribution device of Claim 13, further comprising a user interface whereby the local account manager can be locally accessed (page.4, paragraph 56 & 63).

16. As per claim 15 Thomas-Kerbs disclosed the media distribution device of Claim 14, wherein the user interface is provided via the media presentation device (Kerbs, col.7, lines 27-40).

17. As per claim 17 Thomas-Kerbs disclosed the media delivery system of Claim 16, wherein the local account manager is operative to autonomously transmit the local account data module

to the media delivery service provider for storage as the central account (Thomas, page.1, paragraph 8, page.3, paragraph 45 & page.4, paragraph 59).

18. As per claim 18 Thomas-Kerbs disclosed the media delivery system of Claim 17, wherein the local account data module is transmitted to the media delivery service provider over an asymmetric digital subscriber line (Thomas, page.2, paragraph 41 & page.4, paragraph 59 & 61).

19. The media delivery system of Claim 19, wherein the media delivery service provider transmits the media stream to the media distribution device over an asymmetric digital subscriber line.
